WELCOME TO JAMES HENRY

New Zealand's Leader In Recycled Wooden Flooring Solutions

For us, sustainability is more than just recycling timber. We've been fortunate enough to win the Sustainability category of the Wellington Region Business Excellence Awards twice – in 2014 and again in 2018. It is about the way we approach our business. This is more than turning the lights off in the bathroom and putting plastic in the recycling bin.

WE EMBRACE DIVERSITY

- We have staff from nine different cultures or countries.
- We have provided employment to refugees who have recently arrived in New Zealand, prisoners on a release to work program, prisoners on parole, intellectually disabled people and people with learning difficulties.

WE ARE ACTIVE IN OUR COMMUNITY

- We deliver untreated wood shavings to three community vegetable gardens.
- We actively support the food and community charity Common Unity, based in Eponi with donation of time, volunteers and food.
- Staff get paid time off to donate blood.

WE ENCOURAGE HEALTHY LIVING

- We have run stop smoking incentives and have engaged a stop smoking coach.
- We mentor our staff around financial planning and into home ownership.
- We have a life coach and counsellor who works with those who need a mental health check up.
- Our best staff started with us as workshop labourers, undertook apprentice training, and are now in leadership positions.
- We've had twelve people complete apprentice training with us since 2010.
- Staff turnover is extremely low.

OUR WORK IS AWARD WINNING

The quality of our work and the dedication of our team has been recognised through multiple awards over the years.

Wellington Region Business Excellence Awards

We are proud to say that James Henry achieved **first-place wins** in the **Trade Services and Suppliers** category in 2019, 2018 and 2016. As well as this we were awarded as **winners in the Sustainability category** in 2018 and 2014.

This followed on from first place wins in the 2014 Wellington Business Excellence Awards from the Innovation and Best Emerging Business categories.

Note: These awards were not held in 2020 and 2021.

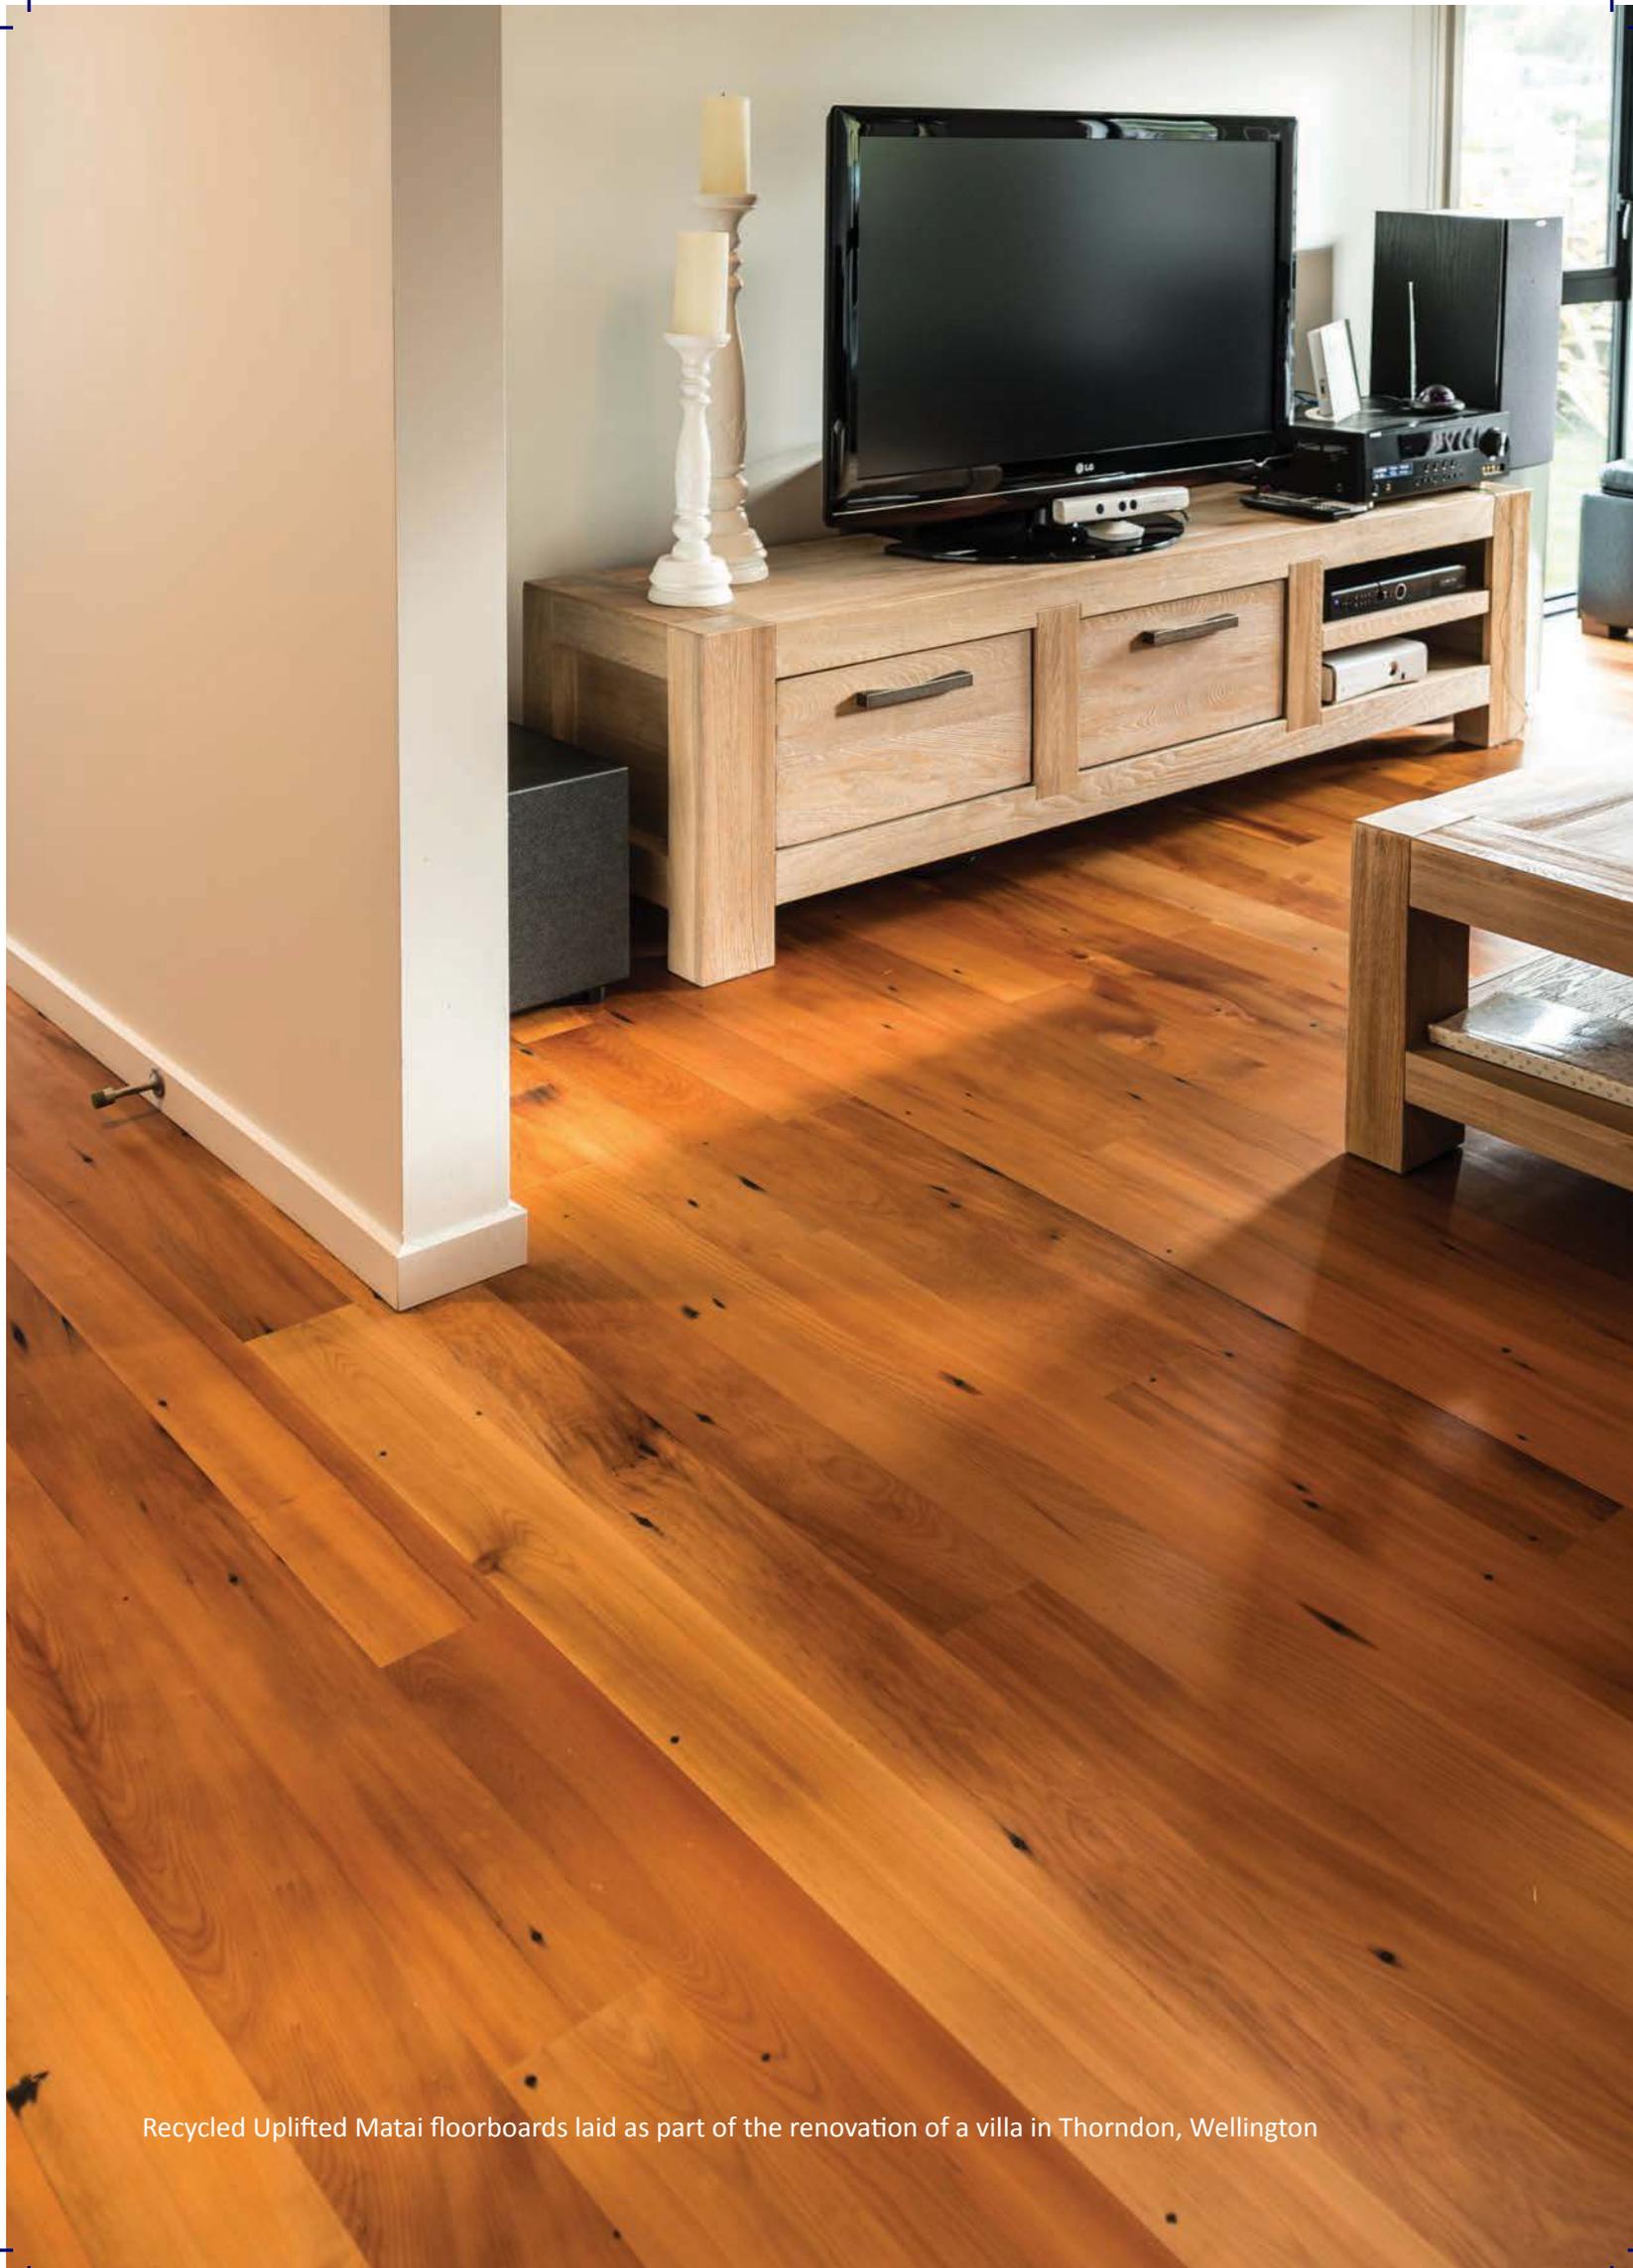

Australasian Timber Flooring Association Annual Awards

The Australasian Timber Flooring Association is the peak body for timber flooring professionals in NZ and Australia.

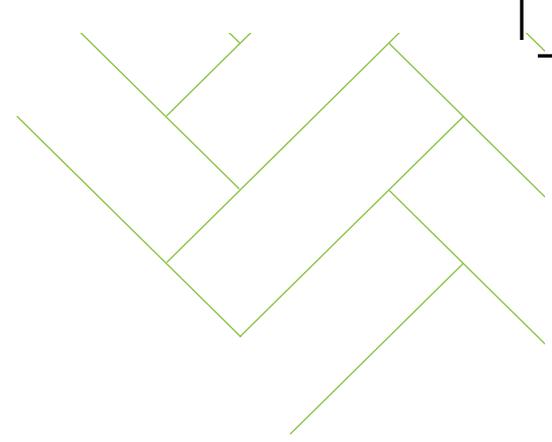

In 2016, 2017 and 2018 we achieved **first place category wins**, including a recycled parquet floor in a house in coastal Taranaki, and for our work at Te Papa, Wellington.

In 2017, we **won the overall Supreme Award** for our work at St Mary of the Angels in Boulcott Street, Wellington.

Note: These awards were not held in 2020 and 2021

Recycled Uplifted Matai floorboards laid as part of the renovation of a villa in Thorndon, Wellington

RECYCLED WOODEN FLOORING

New flooring that has been produced from recycled timber

COST RANGE

Produced from a range of salvaged timber – weatherboards, beams, joists, studs and other recycled timber.

- New Tongue and Groove, so essentially a new floorboard.
- Tongue and Groove with secret-nail profile that fits together nicely, and off-set downwards to allow greater re-sanding.
- Boards pull up and lay together like new flooring with minimal gaps.
- Produced from dry stock. We moisture check the feedstock and kiln dry before machining.
- Can be produced as a square-dressed profile.
- Standard sizes as out lined below or as custom sizes and profiles.

Heart Matai

Mixed Grade Rimu

Jarrah / Karri

Heart Rimu

85mm x 12mm

110mm x 13mm

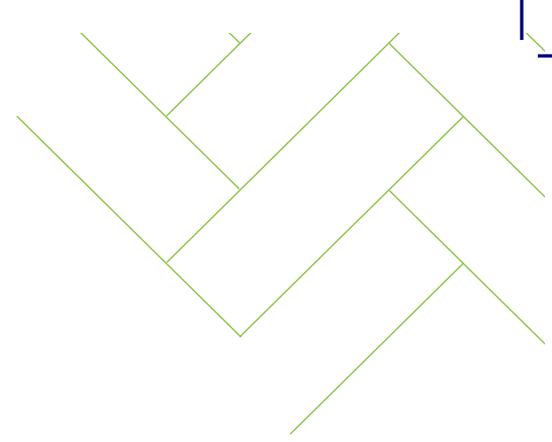

135mm x 19mm

Recycled Uplifted Matai floorboards laid as part of the renovation of a villa in Thorndon, Wellington

RECYCLED UPLIFTED WOODEN FLOORING

COST RANGE

- Original floorboards, uplifted, docked, and ready for re-use.
- Floorboards will have expanded and contracted through 100 summers and winters and aren't being laid back next to their original neighbours. There will be gaps between the floorboards – like an original floor.
- These floorboards will usually take more time to lay than floorboards that have been produced from recycled timber.
- The trade-off is as genuine recycled wooden floor.
- Supply will vary on deconstruction activity happening at the time.
- There is a variety of species available

Recycled Matai, finished with
Rubio Monocoat 2C – Charcoal

Recycled Matai, finished with
Rubio Monocoat 2C – Pure

Recycled Matai, Banker 's
Office Wellington

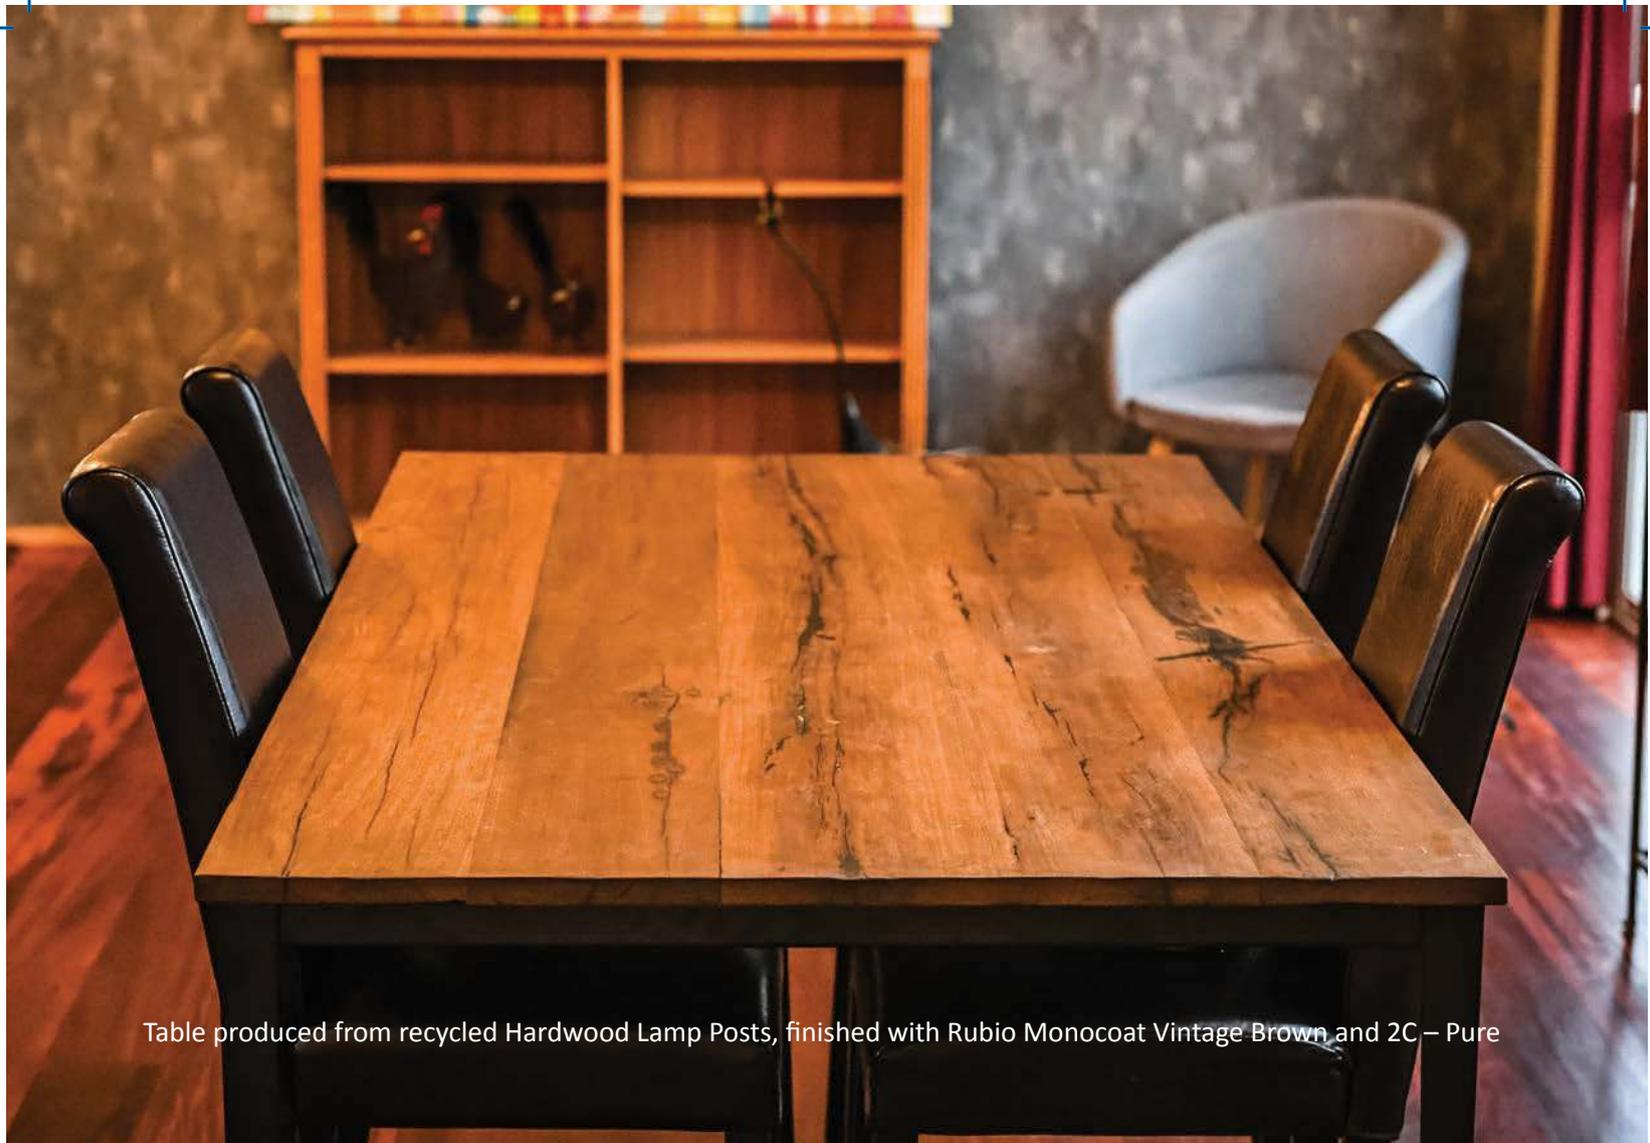

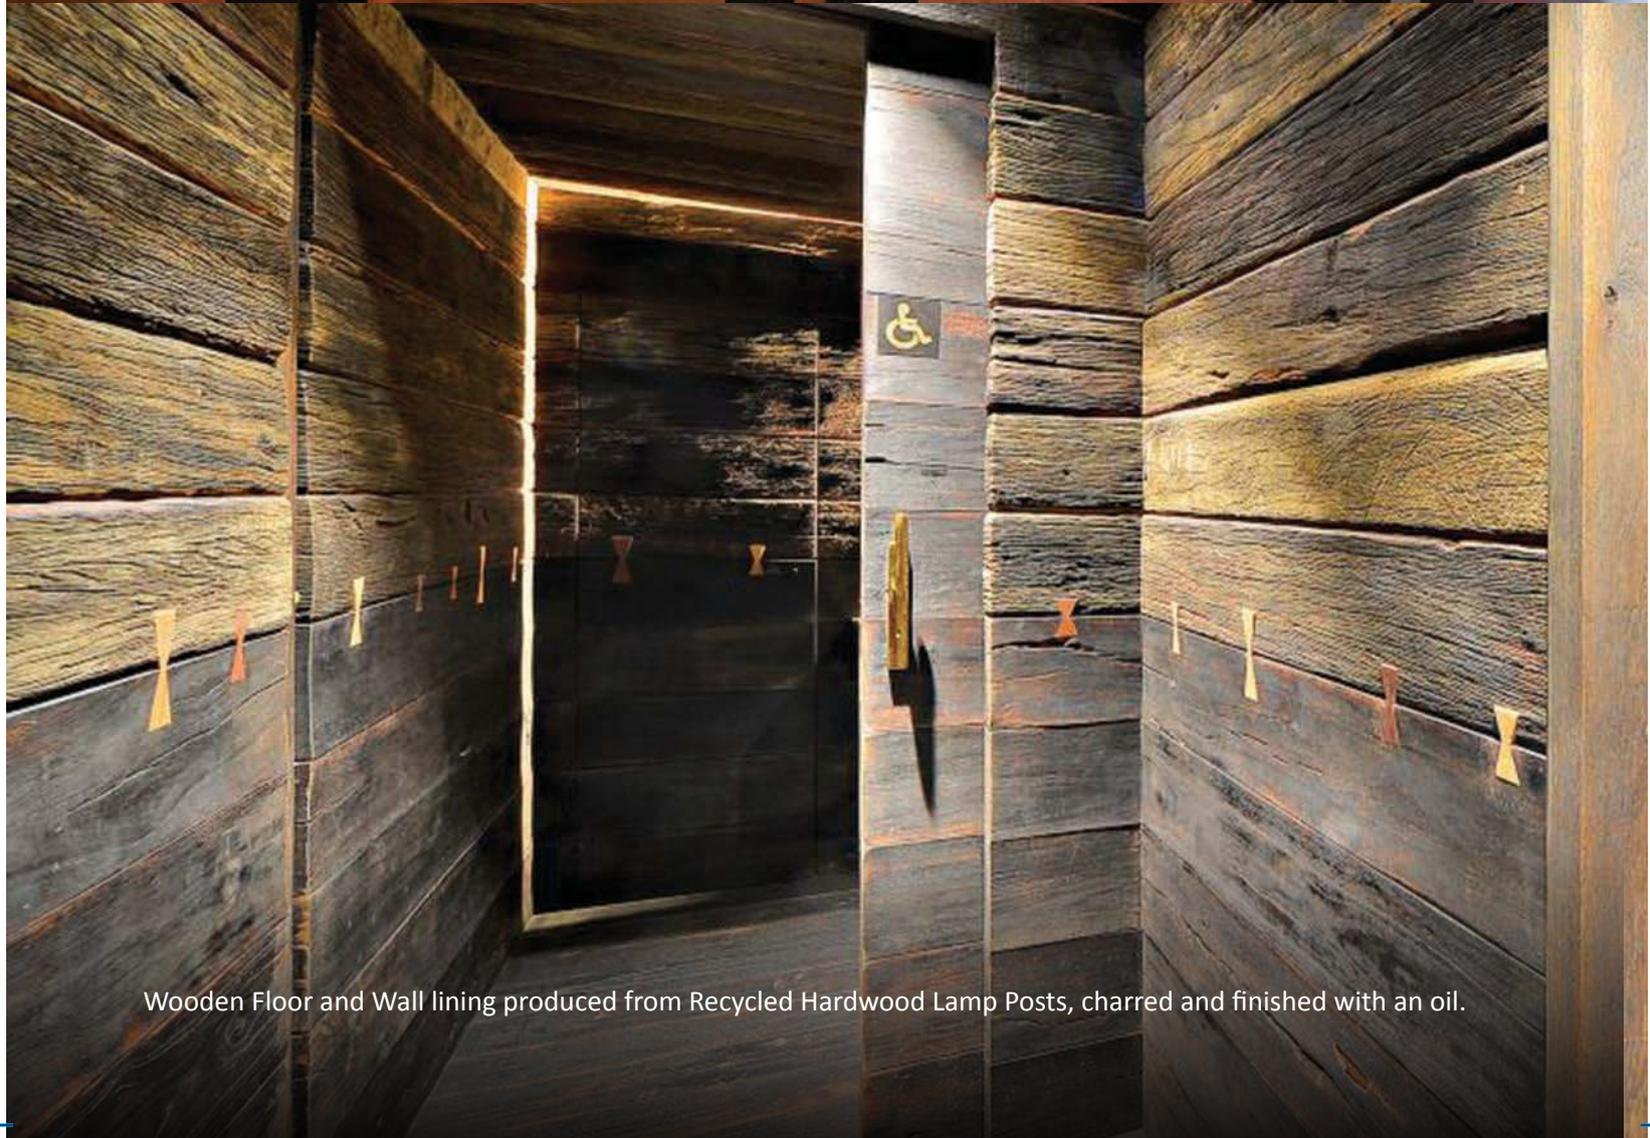

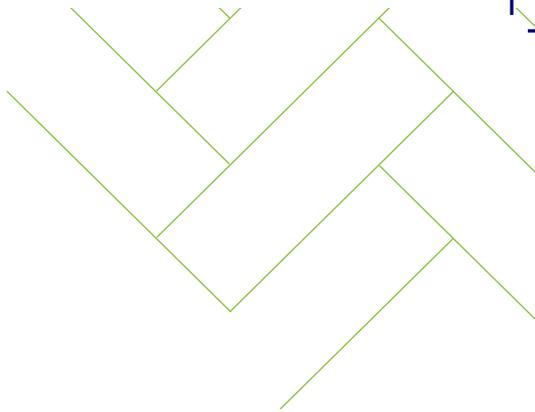

Table produced from recycled Hardwood Lamp Posts, finished with Rubio Monocoat Vintage Brown and 2C – Pure

Wooden Floor and Wall lining produced from Recycled Hardwood Lamp Posts, charred and finished with an oil.

RECYCLED HARDWOOD

Wooden floorboards produced from Railway Sleepers, Bridge Beams and Lamp Posts

COST RANGE

- New floorboards produced from recycled Australian Hardwood, typically Ironbark (Eucalyptus Paniculata and Eucalyptus Sideroxylon).
- Sizes depend upon the recycled feedstock that is available at the time, but typically 130 x 19mm, 180 x 19mm and 130 x 14mm

Floorboards can be dressed, graded as lights & darks.

Or skip-dressed leaving a textured sawn finish.

Rubio Monocoat Pre-Aging – Fumed Light

Rubio Monocoat Pre-Aging – #2

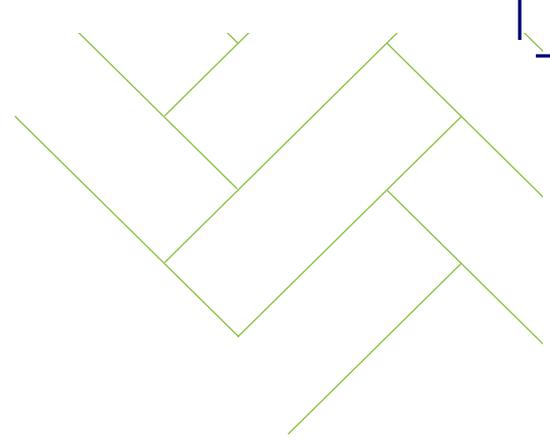

Rubio Monocoat PreColour Easy – Intense Black

Rubio Monocoat PreColour Easy – Vintage Brown

Parquet floor produced from recycled Jarrah timber, finished with Rubio Monocoat 2C – Pure

PARQUET FLOORING

Manufactured by us from recycled timber

COST RANGE

- We manufacture and supply parquet flooring produced from recycled native and imported timber.
- Standard designs or custom made to your requirements.
- It can be laid in herringbone, squares, and rectangular patterns.
- Parquet is a great material for a bespoke floor as you can use pattern, texture and colour to great effect.

PARQUET OPTIONS

- Typically cut 350mm or 280mm long.
- Supplied as strips cut to length, or pre-cut pieces at a specified length.

70mm x 10mm

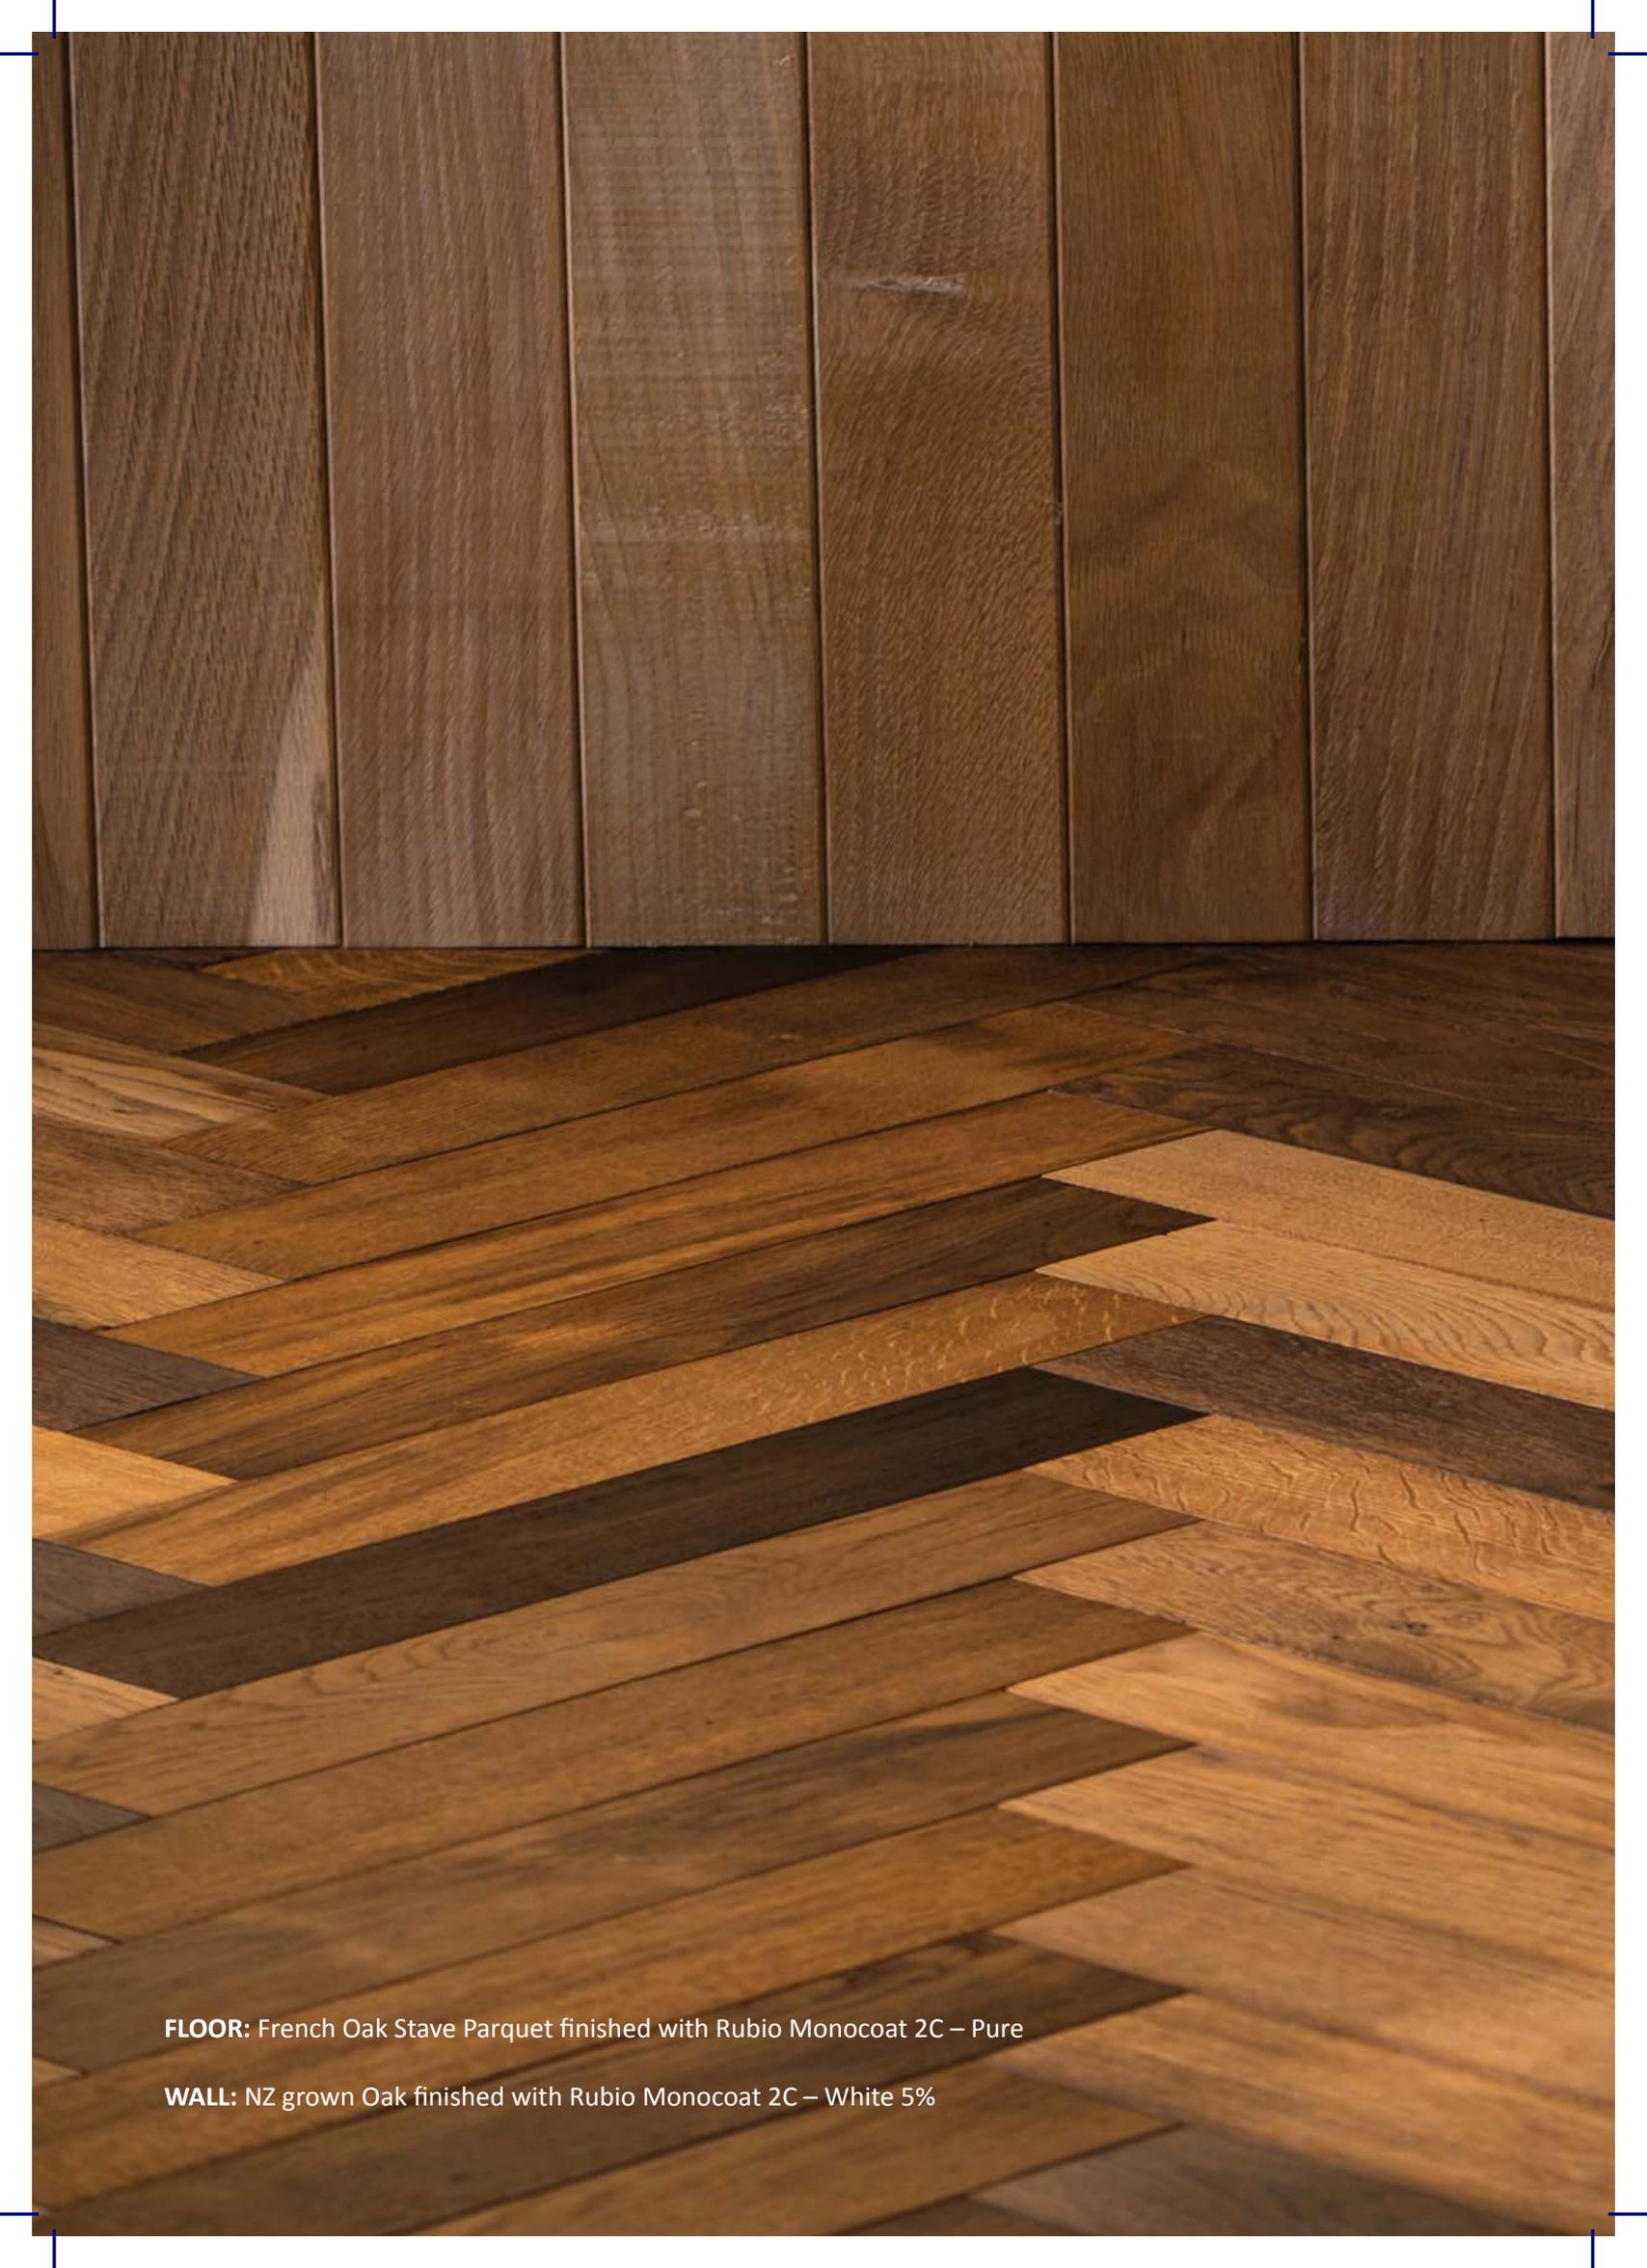

Heart & Mixed Grade Rimu

Mixed Grade Rimu

FLOOR: French Oak Stave Parquet finished with Rubio Monocoat 2C – Pure

WALL: NZ grown Oak finished with Rubio Monocoat 2C – White 5%

FRENCH OAK STAVE PARQUET

Originally used in wine production, and now stunning wooden flooring

COST RANGE

- The Oak staves are used to flavour wine. Once used, these staves are often discarded. We have realised the potential in repurposing this beautiful wood and are proud to be able to ensure its journey continues.
- Oak stave flooring can be laid in a range of parquet patterns. It is given a light sand followed by a coating of oil. We recommend Rubio Monocoat for its durability and range of colours. The use of recycled French Oak, makes this an unarguably sustainable timber-flooring choice.

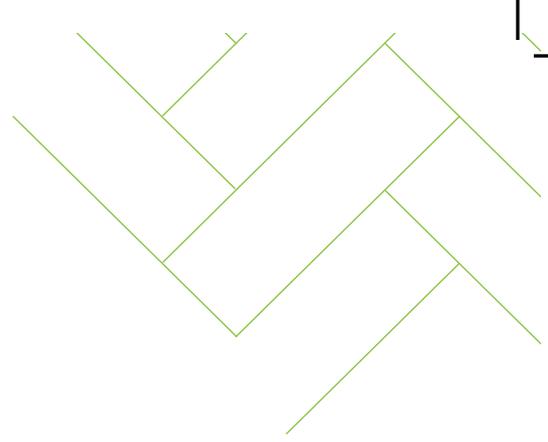

This wooden flooring can be finished in any Rubio Monocoat colour. Some examples below.

Parquet flooring produced from floorboards recovered from the Carterton Memorial Hall

BESPOKE RECYCLED PARQUET

Anything but run of the mill...

COST RANGE

- Parquet flooring is produced from recycled timber in small runs. It is definitely not production-run flooring.
- Supply will depend upon what feedstock is able to be sourced from de-construction projects.
- Talk to us – these are special projects.

Recycled Colour Matai

Recycled Jarrah finished with
Rubio Monocoat 2C – Pure

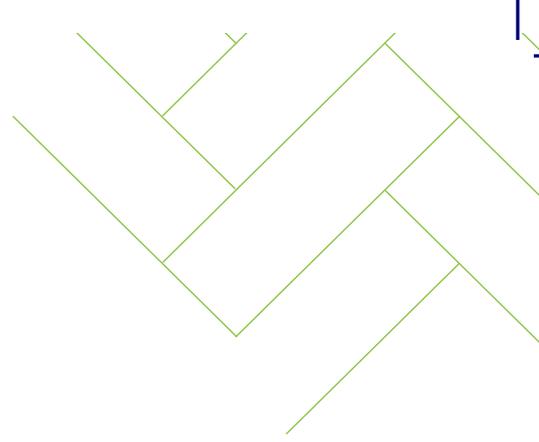

Recycled Jarrah finished with
Rubio Monocoat PreColour
Intense Black and 2C – Black

Recycled Australian Hardwood

Recycled French Oak floorboards. House in Belgium.

RECYCLED FRENCH OAK

Genuine recycled Oak from France

COST RANGE

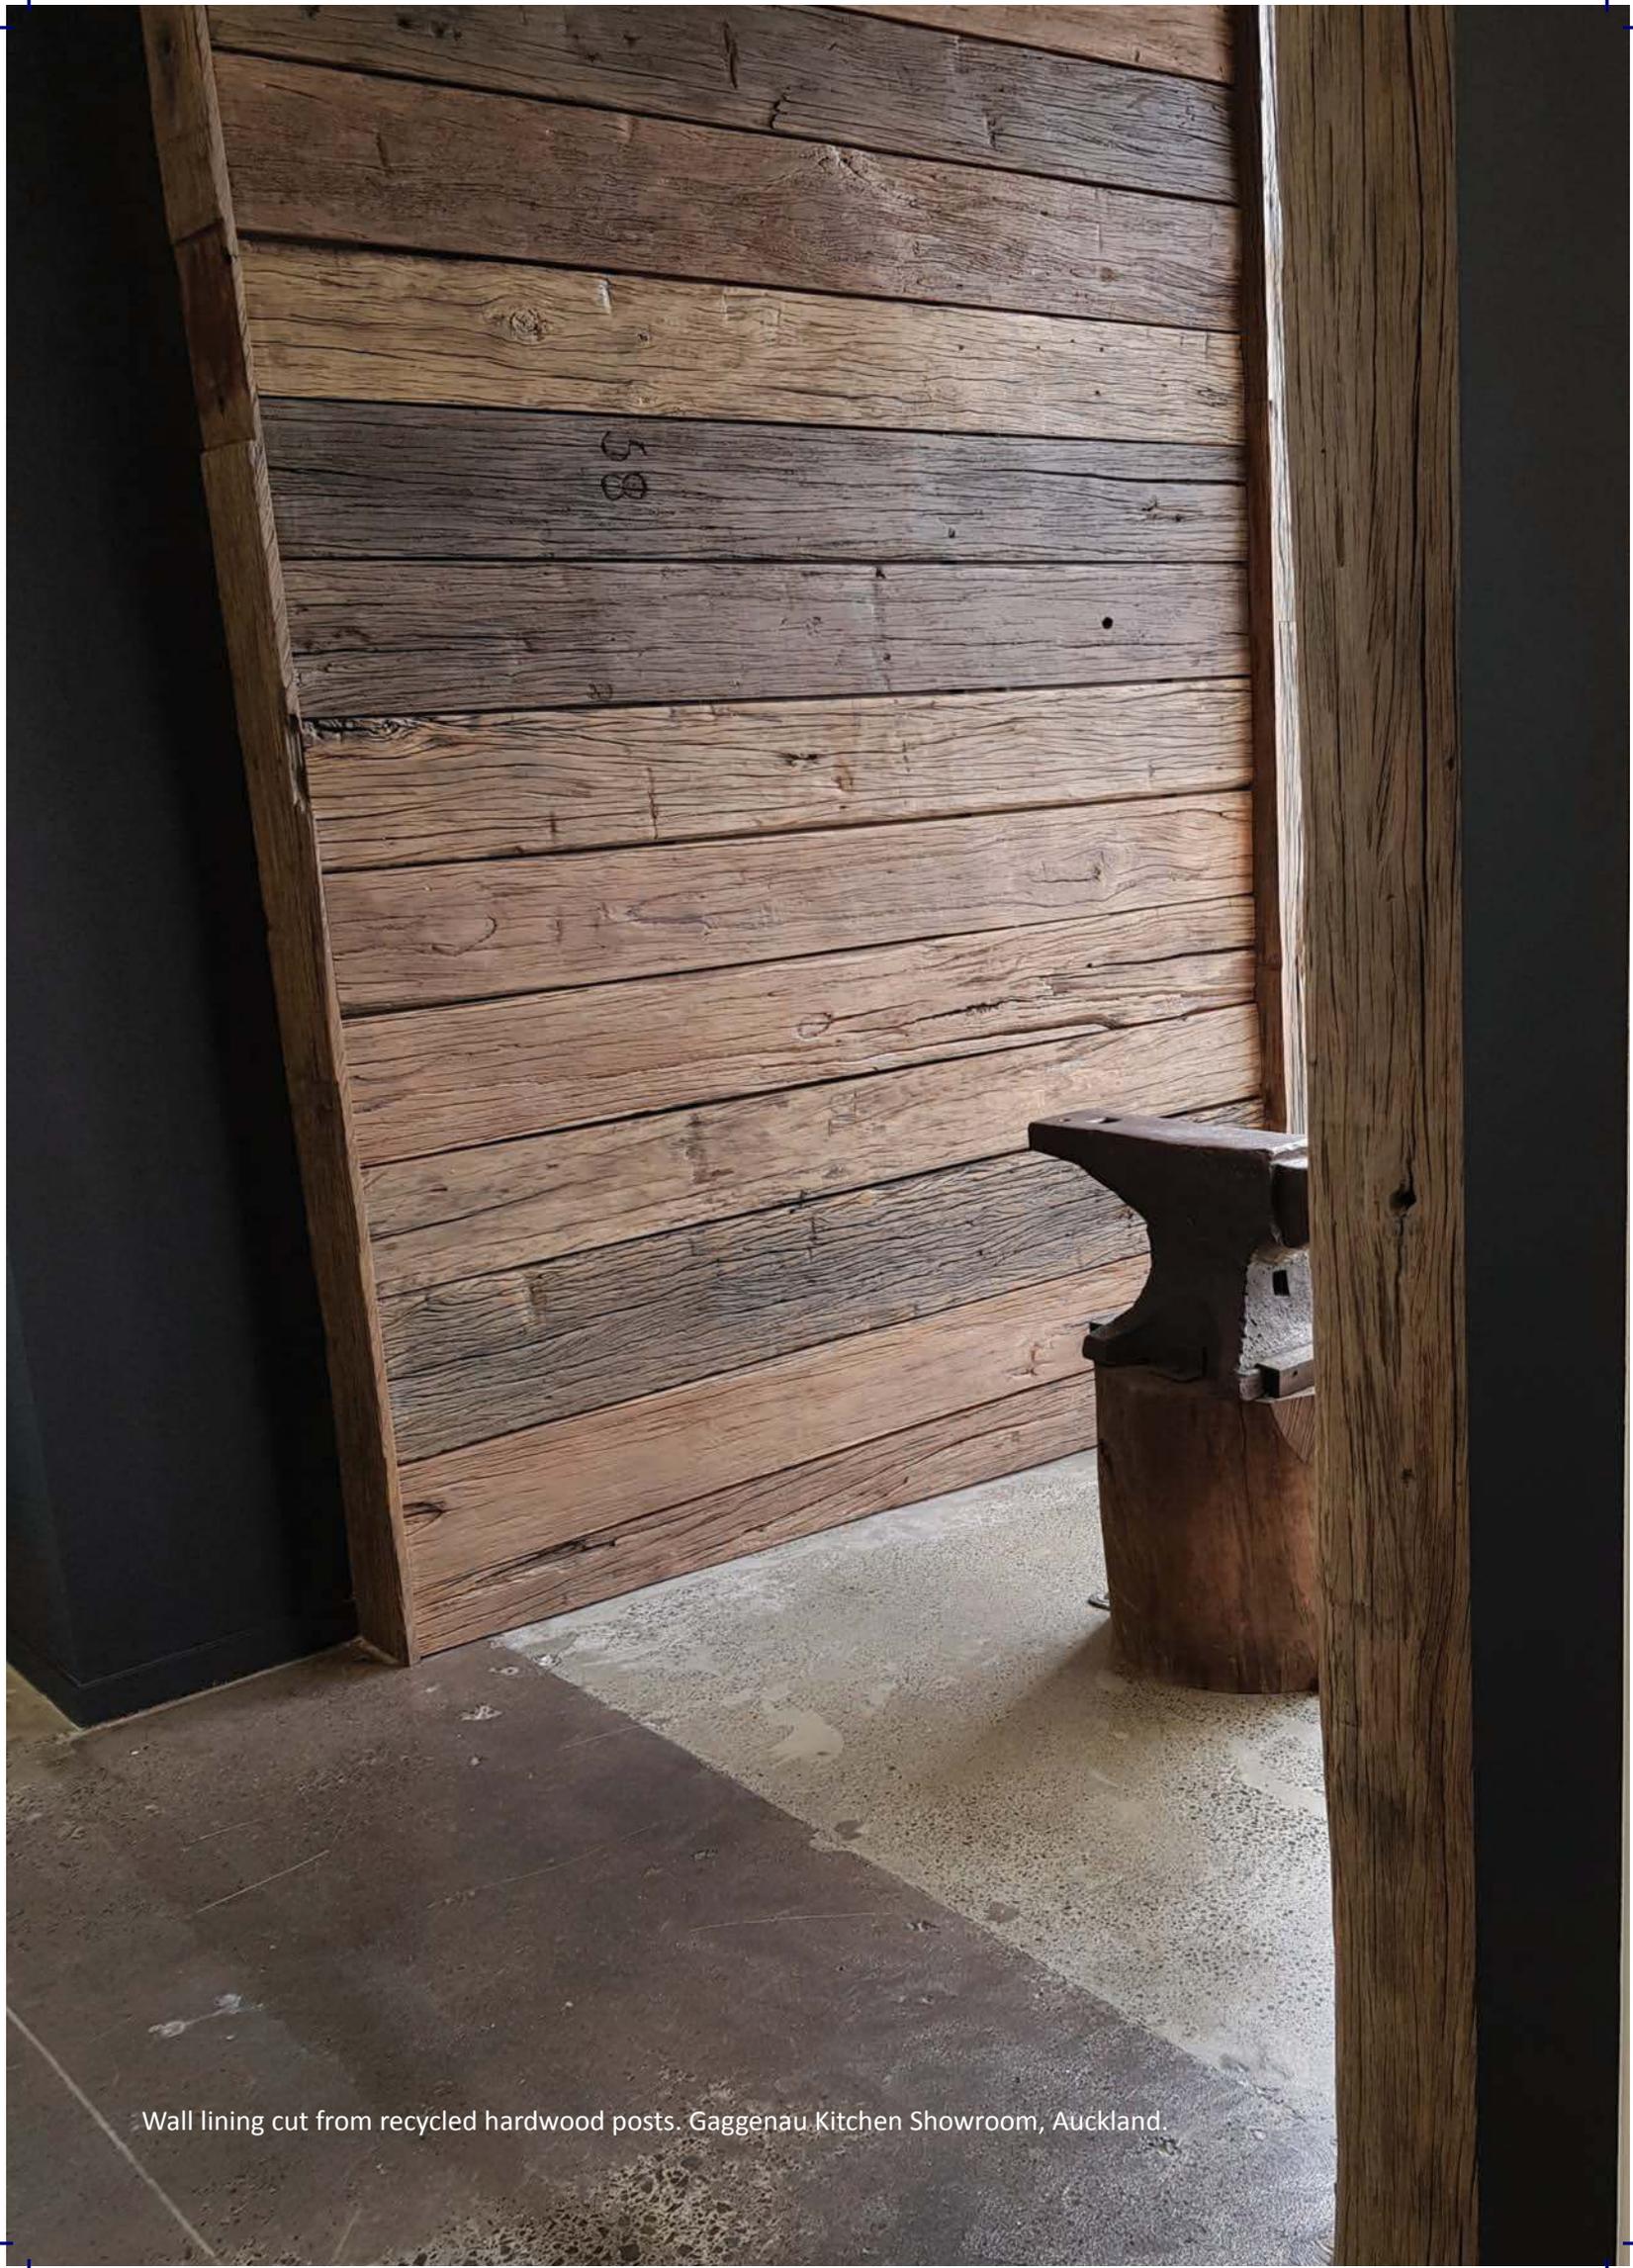

- We have travelled through France in search of suppliers of recycled French Oak. This is genuine recycled French Oak.

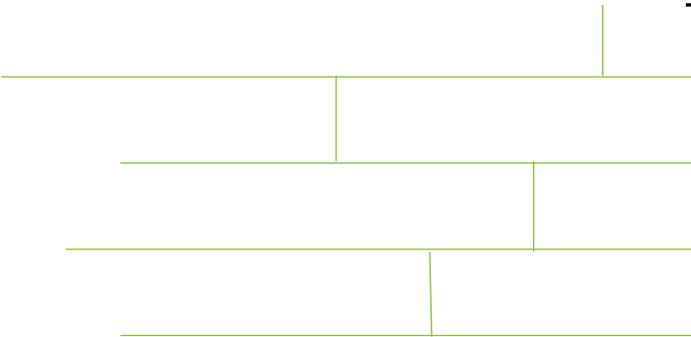

Original floor
Sizes 70 to 250mm wide x 19mm thick

Recycled Railway Wagon Boards
Sizes 120 to 160mm wide x 19mm thick

Wall lining cut from recycled hardwood posts. Gaggenau Kitchen Showroom, Auckland.

RECYCLED WALL LINING

Wall panelling made from recycled timber

COST RANGE

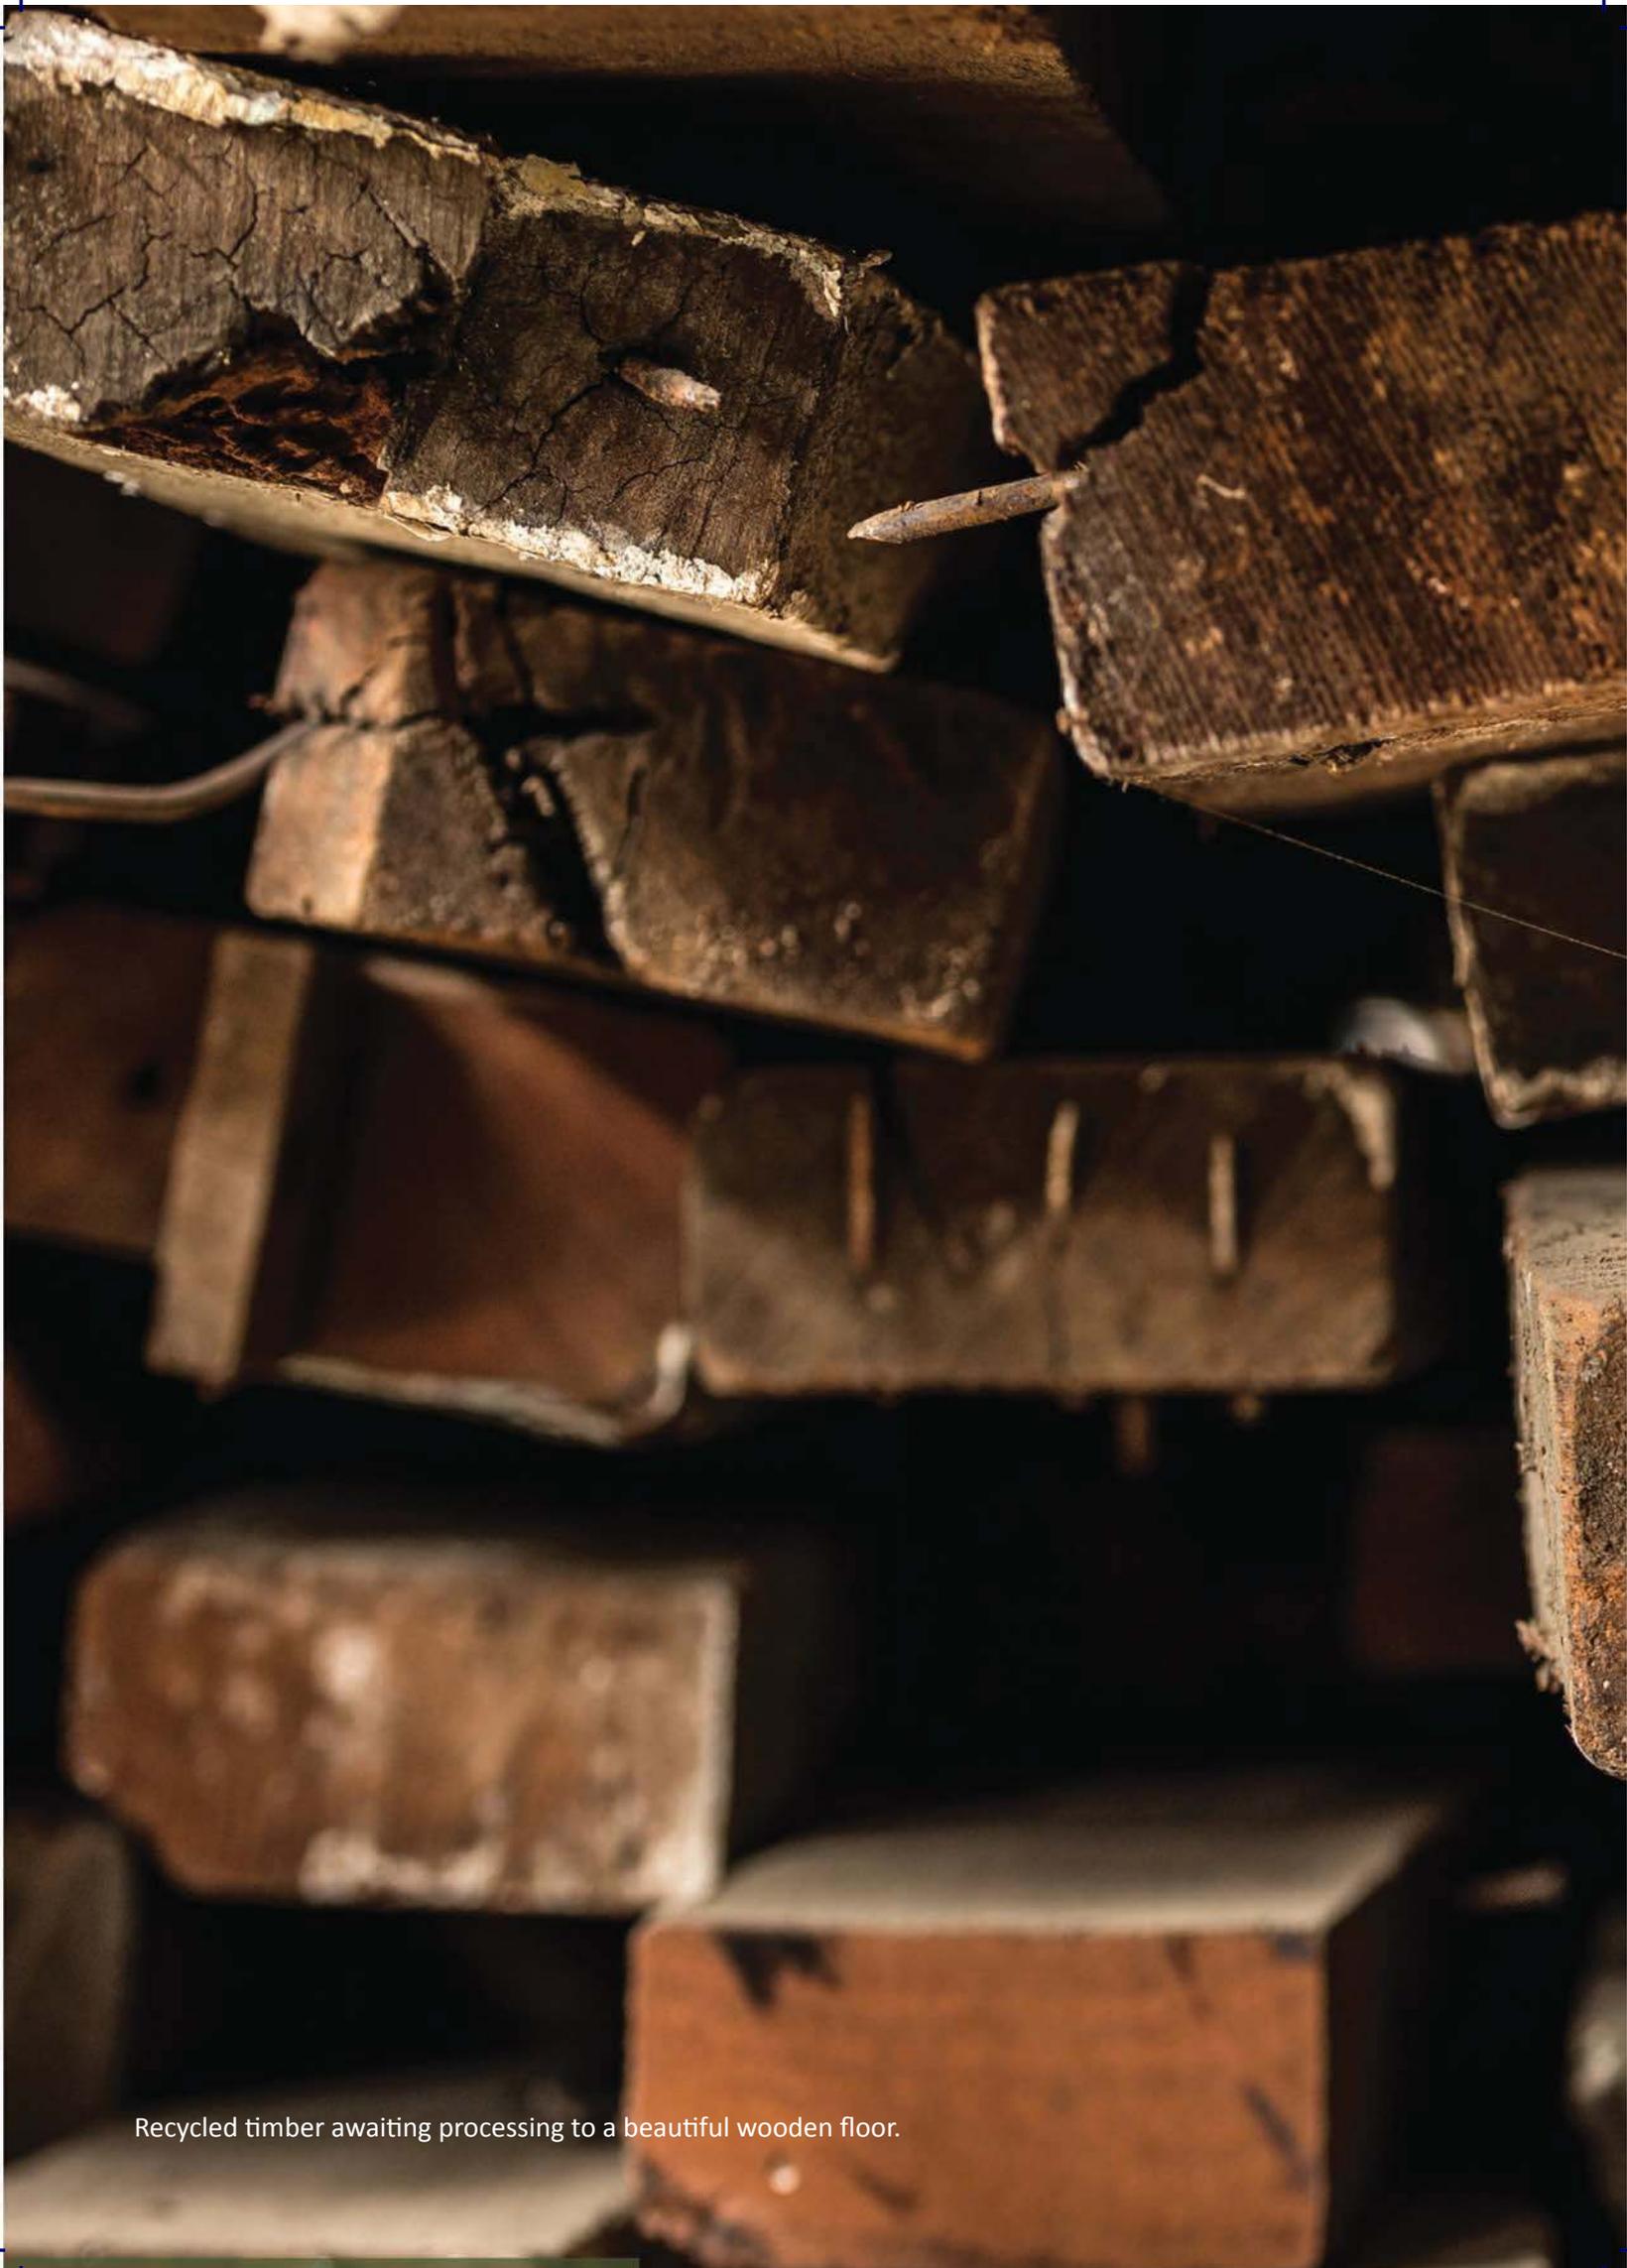

- Available in a range of finishes and timbers.
- Sizes depend on the recycled stock available, but typically 135x19mm and 180x19mm.

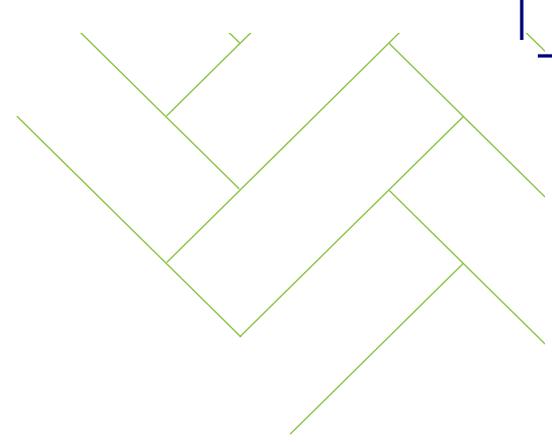

Recycled Rimu

Recycled Jarrah

Recycled timber awaiting processing to a beautiful wooden floor.

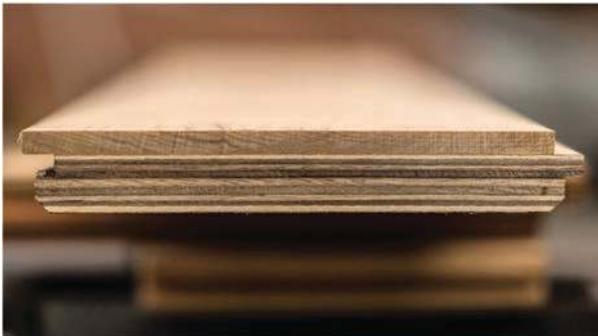

ENGINEERED RECYCLED FLOORBOARDS

Engineered floorboards produced using recycled timber

COST RANGE

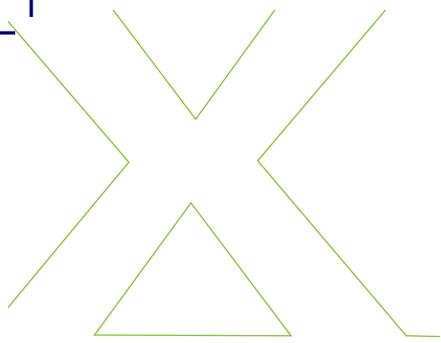

- Produced in smaller production runs in New Zealand. Supply varies depending on recycled feedstock available. There is a range of species available including NZ Kauri, Jarrah, Matai and Rimu.

Boards are usually: 135mm x 20mm (to match original NZ floorboards) 180mm x20mm

Recycled NZ Kauri

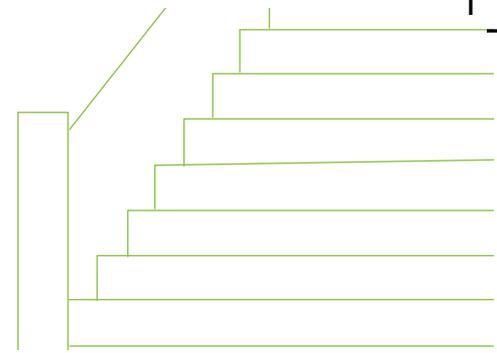

BARN DOORS

Barn doors are on-trend at present, and there's nothing like the charm when it's made from genuine recycled timber.

- We can manufacture barn doors in a range of sizes, using a range of different recycled timber – Totara, Rimu, Matai, Jarrah, and others...

STAIRS

A solid wood staircase will complement any new floor and help to create continuity between levels.

- We have can manufacture stairs using recycled timber, both open-rise treads and traditional closed-rise stairs.
- Talk to us, ideally at the planning stage of your project, about a custom-made stair.

BREAK THE MYTH

Recycled timber is old therefore it must be dry. This is a myth.

We don't assume that old wooden flooring is dry, in fact it's probably not. If it has been allowed to get wet, or has been stored outside, or even in a warehouse, it's most likely not at the correct moisture level for your house or business premises. The downside of using wooden flooring at the wrong moisture level is that it will expand or contract as the moisture level adjusts.

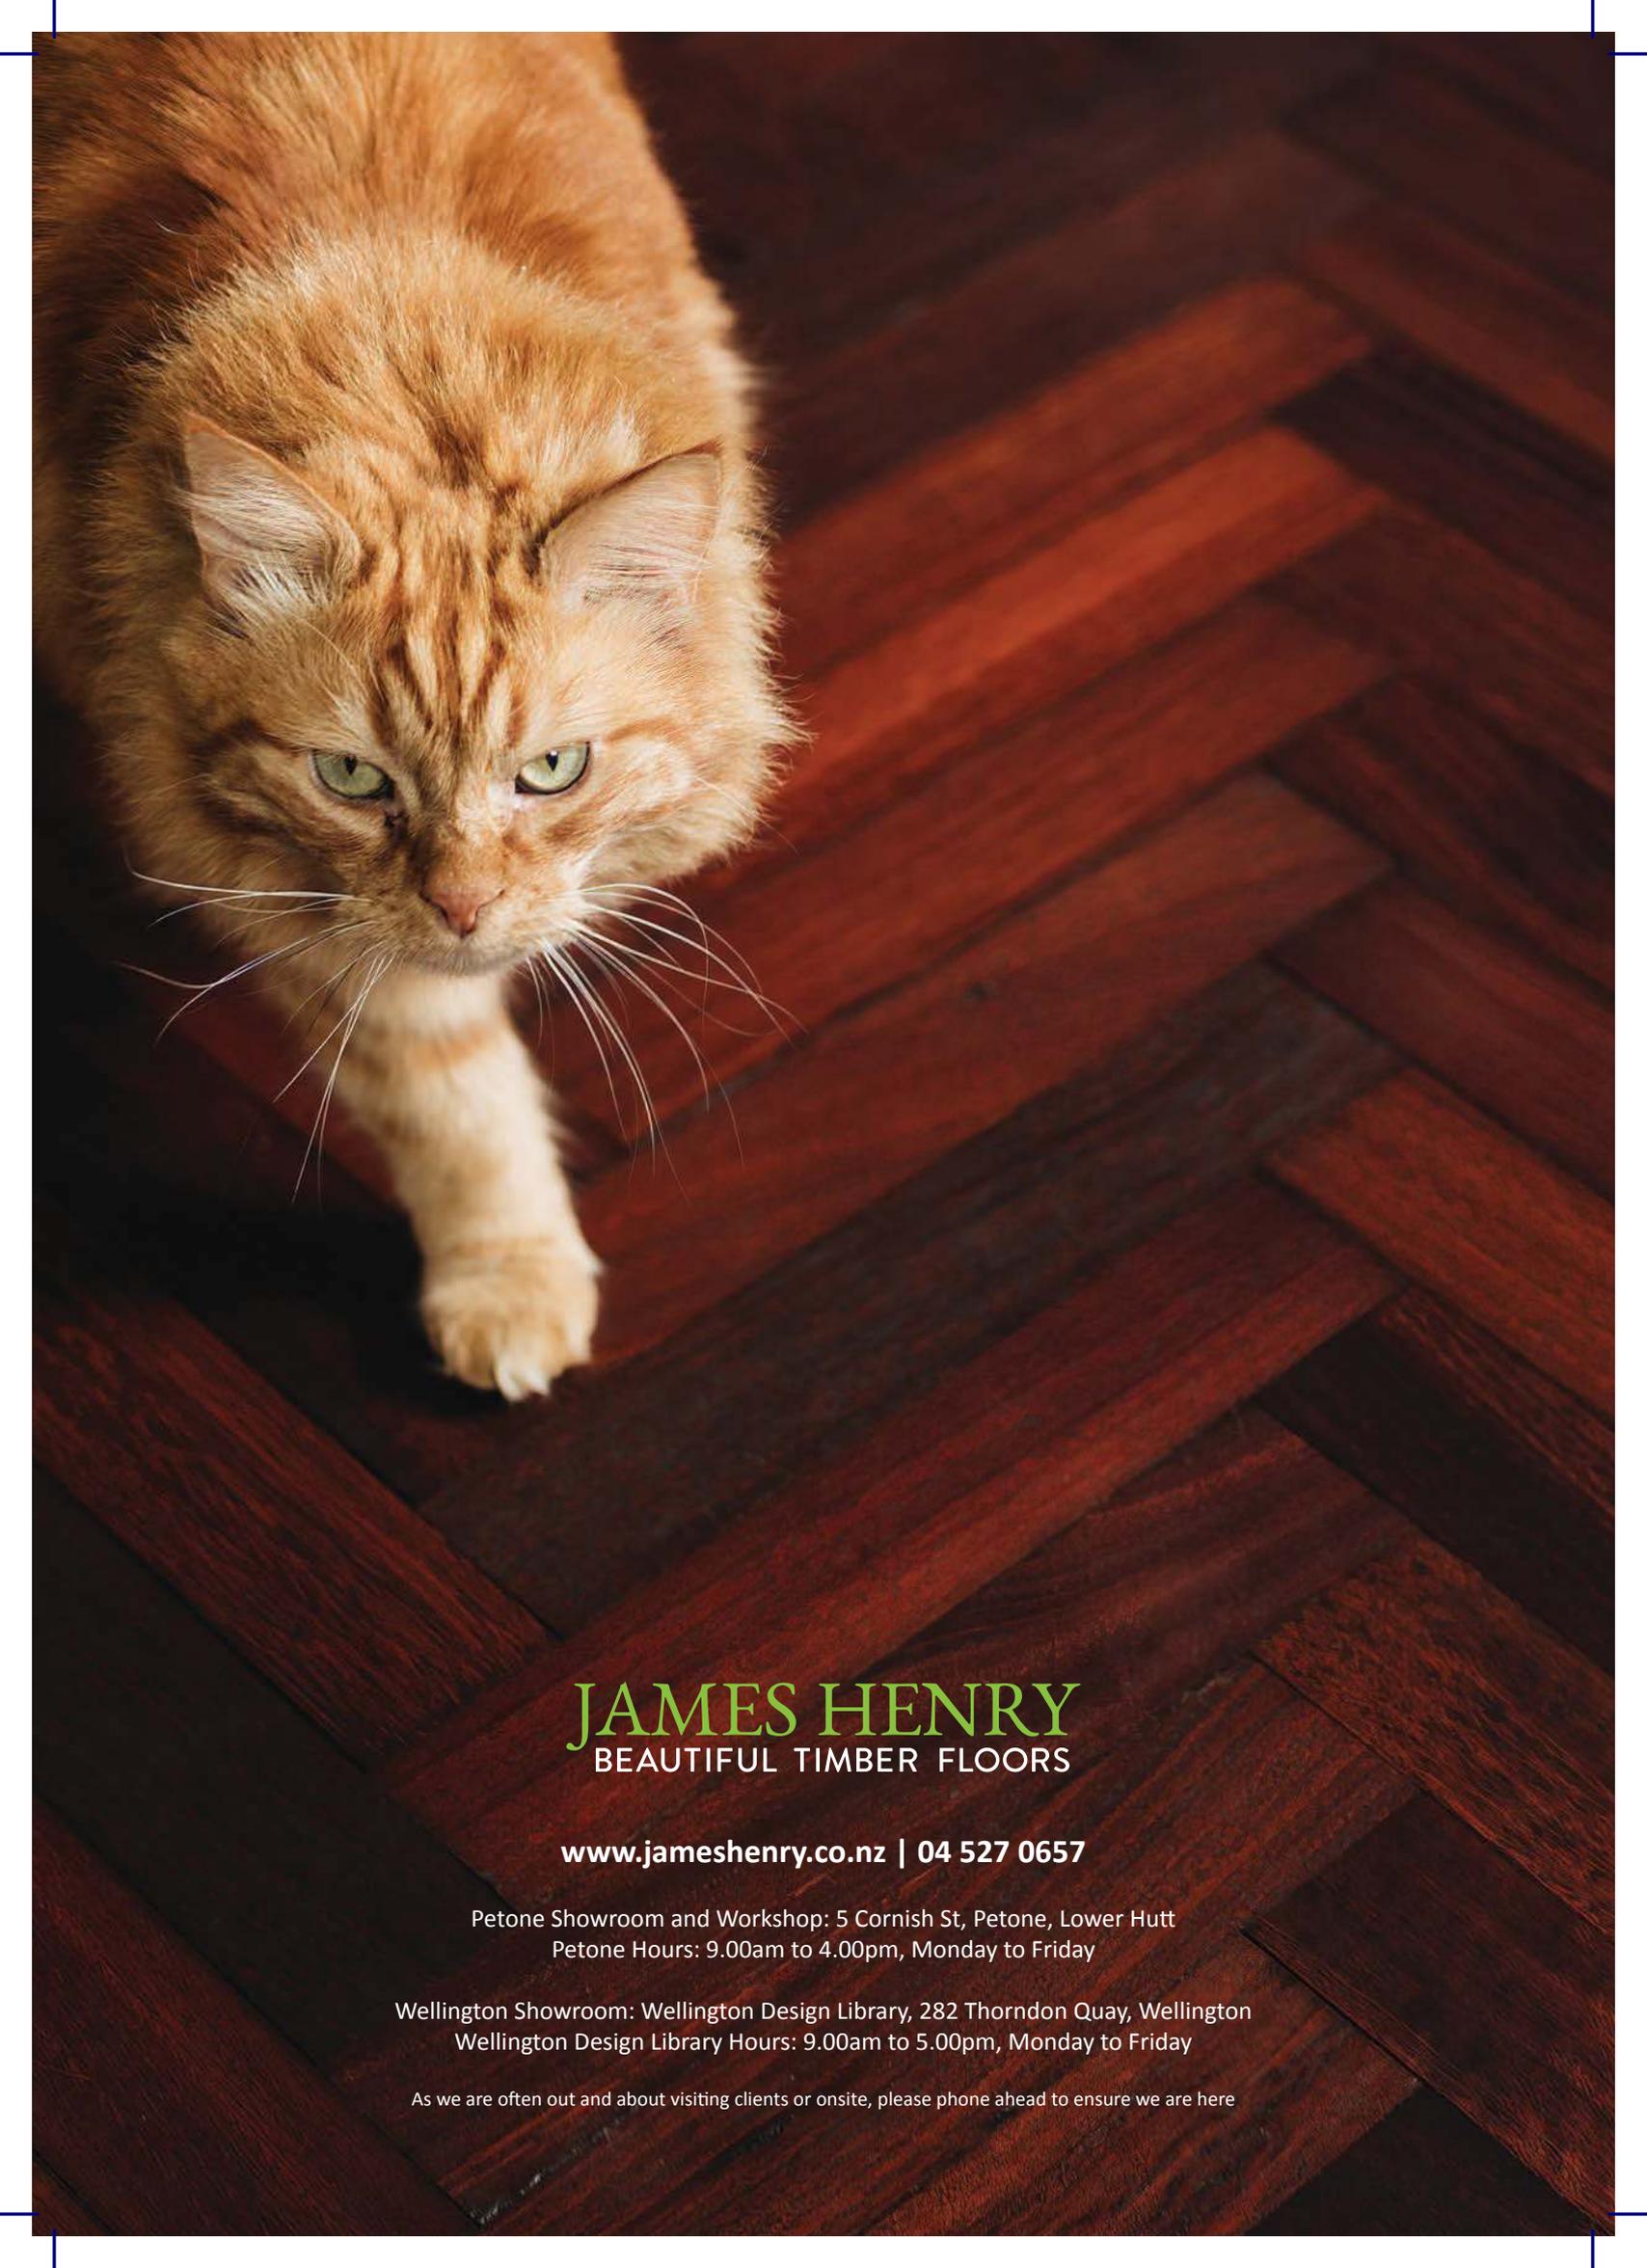

We dry our recycled feedstock timber in our dehumidifying kiln before manufacturing it to wooden flooring.

Our recycled wooden flooring is "reliable recycled" as well as being "unarguably green".

THE JAMES HENRY TEAM

We don't tell our guys to be nice to our customers, we just employ nice people.
